

DIAL donor repositories and demos

Date 2026-08-17 · 75 named rows · Clickable GitHub and demo links

D-38. Donors = look, screens, and workflows. Customise branding for DIAL. Wire every action to DIAL APIs. Do not adopt donor backends, ledgers, auth, or payments as system of record. WhatsApp has no UX donor (official Cloud API only). Do not apply one shared DIAL storefront skin across Spare, Tech, Grocery, Supplier, Delivery, or Account.

Demo labels. Live demo = hosted site, Vercel, Play Store, or APK host. README / screenshots = no hosted product UI; use the official repo or docs. Unverified = this pass could not confirm the URL is up.

Also: FixItNow GitHub homepage [fix-it-now-chi-beige.vercel.app](https://github.com/fix-it-now/chi-beige.vercel.app) (404 on this pass). API fixitnow-v1.vercel.app. Mercur full-stack demo.mercurjs.com. CoolMall GIFs in [README EN.md](#).

1. Surfaces with no storefront UX donor

These DIAL surfaces are intentionally not cloned from a marketplace donor. Do not FixItNow-skin admin, and do not invent a WhatsApp UI kit.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
WhatsApp (Cloud API + Flows)	None — official Cloud API only (D-40)	none (no UX donor)	Meta WhatsApp Cloud API docs	README / screenshots — Cloud API + Flows docs (not a UX kit)	Proprietary API	Official Cloud API + Flows only. EcoCash + COD as buttons (D-57). No Baileys / unofficial clients. Not FixItNow.
Admin (`admin-web`)	In-repo queue-first IA (Pack \$9.5 / v4 \$6.17)	none (no UX donor)	In-repo Pack \$9.5 (this monorepo)	README / screenshots — Pack \$9.5 + D-46 complements below	DIAL in-repo	Queue-first modules A–P. Do not copy FixItNow admin-dashboard. D-46 (CSV, Tractor, Plane, bull-board, Schedule-X) are complements only.
Account (`/account/*`)	None — follows entry branch chrome	none (no UX donor)	In-repo Donor Parity Roadmap \$10	README / screenshots — docs/planning/DIAL Donor Parity Roadmap.md \$10	n/a	Not a sixth storefront. Chrome follows Spare (Mercur) or Tech (FixItNow) entry, or a minimal door. Promo credit: D-42, no cash-out.
Gateway door (`/`, `/home`)	None — neutral Shop Services chooser	none (no UX donor)	In-repo Pack \$9.1	README / screenshots — DIAL Development Agent Pack.md \$9.1	n/a	Auth-first door stays neutral. Destinations are branded. Magic UI + Rive are flourishes only (see D-38 table), not a storefront identity.

2. D-38 storefront and native UX donors

Locked stitch kit (v4 \$6.2.1 / Pack \$9 / donor-identity rule). Pattern look, screens, and workflows onto DIAL APIs. Never adopt donor backends, ledgers, auth, or payments as system of record.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Spare web (primary); Grocery web (IA + food collections); Laundry (multivendor pattern)	Mercur B2C marketplace storefront	primary UX donor	mercurjs/b2c-marketplace-storefront	Live demo — b2c.mercurjs.com	MIT family (confirm storefront LICENSE at clone)	Multi-vendor catalog, seller pages, cart/checkout chrome. Grocery reuses marketplace IA with food tokens — not a new food repo this cycle. DIAL APIs + Meili remain SoR.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Spare web	Your Next Store	secondary	yournextstore/yournextstore	Live demo — demo.yournextstore.com	Confirm at clone (v4 polish option; not primary)	Visual polish for PDP/cart only. Not the Spare primary donor. Do not adopt YNS checkout/payments as SoR.
Spare web	Nimara ecommerce	secondary	mirumee/nimara-ecommerce	Live demo — demo.nimara.store (unverified; HTTP 500 on 2026-08-17)	BSD-family (confirm at clone)	Alternate visual polish to Your Next Store. Pattern screens only; DIAL catalogue/checkout SoR.
Spare web	Medusa DTC starter	secondary	medusajs/dtc-starter	Product site — medusajs.com (no dedicated dtc-starter hosted demo)	MIT	PDP / cart / checkout interaction patterns. Not Medusa as commerce or money SoR.
Tech web (primary); Laundry (Services hub peer)	FixItNow	primary UX donor	AyanSujon/FixItNow	Live demo — fixitnow-client.vercel.app (README Live Project)	Missing LICENSE (recreate / founder UI-copy override; no donor backend)	Orange home-services marketplace: discover → book → rate. Wire to DIAL Job Reserve + rate_card. Do not copy Stripe/SSLCommerz/JWT/Mongo.
Tech web	NearServe	secondary	Pranit-DC/nearserve	Live demo — nearserve.vercel.app	MIT (confirm at Gate 1 paste)	Local-trades discovery polish. Companion only — FixItNow stays primary. Strip Google Maps if studying screens.
Tech web	Homezy	secondary	PrashantJaybhaye/homezy	Live demo — homezy-mu.vercel.app	Confirm at Gate 1 (no paste until SPDX)	Calm booking visuals. Companion only. Recreate; do not vendor backend/payments.
Supplier web; Laundry plant portal	Mercur vendor-panel	primary UX donor	mercurjs/vendor-panel	Live demo — vendor.mercurjs.com	MIT family (repo archived; panel now also in mercurjs/mercur)	Seller catalog, orders, payouts, onboarding IA. Wire to @dial/suppliers. Not Mercur/Medusa as order SoR.
Customer Android (Spare + Grocery paths)	CoolMallKotlin	primary UX donor	Joker-x-dev/CoolMallKotlin	Live demo — Pgyer APK (not Play Store)	MIT	Compose catalog / cart / orders. Recreate shopping UX; DIAL gateway APIs. No Expo. README also has GIFs.
Customer Android	Dukkan	secondary	Dukkan-ITI/Dukkan	README / screenshots — no Play Store listing for this student repo	Confirm at Gate 1	Alternate Compose storefront flows. Strip Shopify/Paymob/Google Maps; DIAL APIs only.
Customer iOS (Spare + Grocery paths)	tunacosgun/eCommerce	primary UX donor	tunacosgun/eCommerce	README / screenshots — no App Store listing found	MIT (README badge; confirm LICENSE at clone)	SwiftUI shopping: browse, cart, orders. Recreate; DIAL APIs. Do not adopt Firebase/Stripe as SoR.
Customer iOS	Pow	secondary	EmergeTools/Pow	README / screenshots — SwiftUI transition library	MIT	Micro-interaction polish only — not a storefront.
Technician Android (architecture); Delivery Android (modules)	Now in Android	primary UX donor	android/nowinandroid	Live demo — Google Play listing	Apache-2.0	Offline-first module skeleton (job cache, evidence queue). Tech workflows still FixItNow-shaped; money = DIAL Take-Home + WHT.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Technician Android	Android Compose samples (Jetsnack / Reply / Jetcaster)	secondary	android/compose-samples	README / screenshots — Android Developers sample catalog	Apache-2.0	Material 3 motion polish. Not a product storefront donor.
Delivery Android (primary); Grocery / Laundry courier screens	foodhub-compose (rider flavour)	primary UX donor	furganullah717/foodhub-compose	README / screenshots + YouTube series (no Play Store for this tutorial repo)	Apache-2.0	Rider offer / run / POD / COD chrome. Strip Google Maps → MapLibre; strip Stripe/Firebase money. Job engine = packages/delivery.
Web primitives (Tech copied set; Spare/Grocery must not inherit Tech orange)	shadcn/ui	library	shadcn-ui/ui	Live demo — ui.shadcn.com	MIT	Radix + Tailwind primitives vendored in-repo. Inside donor-patterned screens — not a substitute for Mercur/FixItNow storefronts.
Gateway welcome / marketing flourishes only	Magic UI	secondary	magicuidesign/magicui	Live demo — magicui.design	MIT	Gateway welcome-back flourishes only. Not Spare/Tech/Grocery storefront identity.
Cross-app tokens (admin / native / print — not shared customer storefront skin)	Style Dictionary	library	amzn/style-dictionary	Live demo — styledictionary.com	Apache-2.0	packages/design-tokens JSON → Tailwind / Swift / Compose. Not one DIAL storefront brand across branches.
Gateway / home motion	Rive (official runtimes)	library	rive-app/rive-react	Live demo — rive.app	Runtime OK (proprietary editor; official runtimes)	Same .riv greeting/host asset on web/Android/iOS. Optional. Not a storefront donor.

3. Dial Laundry — laundry-specific UX donors

From DIAL_Laundry_Consolidated_Blueprint.md Part C. Mature laundry OSS is scarce. Prefer Dial a Tech + grocery dual-slot + Spare agency spine; absorb laundry repos as screen donors only. FixItNow, Mercur, foodhub, PicPeak, Cal.com, and Schedule-X are listed in their primary sections and reused here.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Dial Laundry (P0 research)	Lavandaria	primary UX donor	HSousa1987/Lavandaria	README / screenshots — no hosted demo found	MIT	Kg + itemized orders, condition-photo verification, status lifecycle. Pattern only — not money SoR.
Dial Laundry (P1)	Dry-Drop	secondary	JordanCJ7/Dry-Drop	Live demo — GitHub homepage InfinityFree	MIT	PHP laundry pickup/delivery scheduling, COD, customer/admin dashboards. Screen flows only.
Dial Laundry (P1)	Daya Laundry	secondary	ahmadnurhidayat/laundry	Live demo — laundry.beyondyou.my.id (README deploy URL)	Check SPDX at Gate 1	Per-kg / per-item POS, public track token, thermal receipt layout. Fiscal truth = DIAL FDMS, not the donor receipt engine.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Dial Laundry (P1 POS)	we-laundry-client	secondary	hxxtae/we-laundry-client	Live demo — welaundry.netlify.app	Apache-2.0 (verify)	Dry-shop POS intake UX. Strip foreign payments; DIAL APIs.
Dial Laundry (Park — screen sketch)	Sunshine Laundrymat	secondary	nrobbyjay/sunshinelaudrymat	README / screenshots — WIP; no hosted demo found	MIT	Immature wash/fold + P/D boilerplate. Sketch only.
Dial Laundry (Park)	WashWise	secondary	MrPatt025/WashWise	README / screenshots — no hosted demo found	Claims MIT (verify)	Park / likely reject as SoR. Low-maturity laundromat SaaS — not Dial job SoR.
Dial Laundry / Tech dispatch boards (P1)	Open Field Scheduling	secondary	clawnify/open-fieldservice	README / screenshots — local demo only (localhost:5174)	MIT (verify)	FSM dispatch UI study. Immature stars. Not delivery job SoR (D-45).
Dial Laundry POS ticket UI	opensourcepos	secondary	opensourcepos/opensourcepos	Product site — opensourcepos.org	MIT (+ footer retention clause)	Retail ticket UI study only. REJECT as runtime / agency FDMS SoR.
Dial Laundry (REJECT runtime)	Smart Laundry Basket	rejected-as-SoR	sureshalluru/smart_laundry	README / screenshots — optional UX screenshots only with counsel	Elastic-2.0 (not OSI)	Elv2 + Google Maps + Stripe defaults. Reject as self-host marketplace runtime. Optional park screenshots with counsel.

4. Delivery, maps, and dispatch (not D-38 storefronts)

D-44 / D-45 / D-45a. Courier Android UX is foodhub-compose (section 2). Job engine stays in-repo. Maps = MapLibre + Nominatim + OSRM + VROOM — not Google/Mapbox as SoR.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Delivery dispatch (packages/delivery + Temporal)	AWS Last Mile Hyperlocal	algorithm donor	aws-samples/aws-last-mile-delivery-hyperlocal	README / screenshots — no hosted product demo (sample repo)	MIT-0	Reimplement offer → accept/reject → requeue + ranking into Temporal. Do not run AWS IoT/Step Functions/Dynamo as SoR.
Delivery / admin / customer track maps	MapLibre GL JS + Native	library	maplibre/maplibre-gl-js	Live demo — maplibre.org	BSD-3-Clause	Client map SoR (D-44). Native: maplibre-native. Not a storefront donor.
Delivery Android maps	maplibre-compose	library	maplibre/maplibre-compose	README / screenshots — MapLibre Compose docs	BSD	Compose bindings for courier map. Replace donor Google Maps.
Geocoding sibling	Nominatim	ops sibling	osm-search/Nominatim	Live demo — nominatim.openstreetmap.org	GPL-2.0 (server)	Self-host geocode sibling. Pin/landmark — not Google Geocoding as SoR.
Drive-time / distance	OSRM	ops sibling	Project-OSRM/osrm-backend	Live demo — map.project-osrm.org	BSD-2-Clause	Self-host drive-time bands + ETA (Blueprint I-2).
Multi-stop VRP (post-accept)	VROOM	ops sibling	VROOM-Project/vroom	README / screenshots — no public hosted VRP playground as product demo	BSD-2-Clause	Courier + tech multi-stop after accept. Not who gets the job.
Delivery VRP alternate (not offer-cycle)	jsprit	secondary	graphhopper/jsprit	README / screenshots	Apache-2.0	Keep as VRP alternate if VROOM fails. Reject as offer-engine.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Delivery Android (MIT secondary mention in stitch bake-off)	Deliverr	secondary	kaaneneskpc/Deliverr	README / screenshots	MIT	Another Compose food-delivery flavour. foodhub-compose remains D-44 primary.
Delivery product pattern (AGPL — never job SoR)	Fleetbase + Navigator	rejected-as-SoR	fleetbase/fleetbase	Product site — fleetbase.io	AGPL-3.0	Study Fleet-Ops lifecycle + Navigator POD/QR. Do not fork into monorepo; do not run as job engine (D-45).
Delivery Navigator app (AGPL reference)	Fleetbase Navigator	rejected-as-SoR	fleetbase/navigator-app	README / screenshots — RN courier app (C-5: pattern only, not customer shell)	AGPL-3.0	POD, QR, issue/fuel reports. Reference-only. Courier app is native Kotlin + foodhub patterns.
Delivery stack-shape (AGPL — immature)	Witylogix	rejected-as-SoR	wityliti/witylogix	README / screenshots	AGPL-3.0	Closest infra rhyme (BullMQ + OSRM). Pattern/workflow only — never runtime SoR.

5. Schema-only and rejected-as-SoR (named so they are not confused with D-38)

These appear in v4 / stitch / Pack. They are either catalogue/promo schema references or explicit non-donors (licence, Expo/RN, second money engine).

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Spare fitment / PIM (not customer UI)	SandPIM	schema-only	autopartsourcesandpim	README / screenshots — PHP/LAMP app; no DIAL-usable hosted UI demo	MIT	ACES/PIES cross-check for FitmentClaim / vehicle_master. Wrong stack to run or fork as SoR.
Marketplace domain shapes (not money SoR)	Mercur core	schema-only	mercurjs/mercur	Live demo — mercurjs.com / demo.mercurjs.com	MIT	Vendor-commission-order-split schema ideas. DIAL Postgres remains operating engine. Never Mercur runtime ledger.
Promotions stitch (D-42) + marketplace shapes	Medusa (Promotion Module / v2)	schema-only	medusajs/medusa	README / screenshots — Medusa promotion docs	MIT	computeActions / budgets / application methods → in-repo @dial/promotions. Reject Medusa as money or promo runtime SoR.
Promotions stitch (D-42)	OfferKit	schema-only	offerkit/offerkit	README / screenshots	Confirm at clone (Pack: check OfferKit)	Referrals, stackable redeem, promo_credit ledger pattern. Reimplement in @dial/promotions. No OfferKit Docker as SoR.
Spare (visual reference only — not locked donor)	Saleor Paper storefront	rejected-as-SoR	saleor/storefront	Live demo — storefront.saleor.io	FSL-1.1-ALv2	v4: visual reference only, not a locked donor. Counsel must clear FSL before any paste.
Tech / delivery (visual reference only — not locked; Expo/RN + proprietary API)	Enatega food-delivery-multivendor	rejected-as-SoR	enatega/food-delivery-multivendor	Product site — enatega.com	Frontend MIT-ish; backend proprietary	v4: visual reference only. Conflicts C-5 (Expo/RN) and D-38 locked Tech donor (FixItNow). Backend is not OSS SoR.
Customer apps (explicitly rejected)	Expo ecommerce tutorial shells	rejected-as-SoR	burakorkmez/expo-ecommerce	README / screenshots — rejected example named in v4 §6.2.1	n/a (do not adopt)	Named example of Expo/RN customer shells rejected by C-5.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Admin ledger explorer (never money SoR)	Formance Ledger Console (patterns)	rejected-as-SoR	formancehq/ledger	README / screenshots — Formance docs / product	MIT (ledger); Console = pattern only	Study account/posting explorer screens. Reimplement read-only views on DIAL ledger_* + Job Reserve. Never run Formance as SoR.
Admin ledger explorer alternate	Blnk	rejected-as-SoR	blnkfinance/blnk	Product site — blnkfinance.com	Apache-2.0	Alternate ledger display patterns. Same rule: never money SoR.
Grocery enrichment (not UX donor)	Open Food Facts	schema-only	openfoodfacts/openfoodfacts-server	Live demo — world.openfoodfacts.org	ODbL (data)	Grocery plan: enrichment only. Not a storefront. Catalogue SoR stays DIAL Postgres + Meili.

6. Secondary / ops — experience tools and D-46 complements (not D-38 storefronts)

Canonical tool picks (v4 \$6.10) and complementary ERP/ops stitch (D-46). These are siblings, libraries, or admin-pattern donors. They must not be mistaken for Spare/Tech/Grocery storefront identity.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Tech / Laundry booking slots (not job SoR)	Cal.com	ops sibling	calcom/cal.com	Live demo — cal.com	AGPL-3.0 (self-host)	Non-emergency slot calendar adapter. Job + money SoR = DIAL Job Reserve. Recreate FixItNow slot-picker UI.
Booking slots MIT CE option	cal.diy	ops sibling	calcom/cal.diy	README / screenshots	MIT (community edition)	Laundry blueprint: MIT CE sibling for slots. Same rule — Dial capacity/job SoR remains Dial.
Shared inbox (web + WhatsApp continuity)	Chatwoot	ops sibling	chatwoot/chatwoot	Live demo — chatwoot.com	MIT (+ enterprise)	Human chat. Status/truth from ERP. Deep-link conversations to dispute/order ids. Not a second helpdesk SoR.
Post-job surveys	Formbricks	ops sibling	formbricks/formbricks	Live demo — formbricks.com	AGPL-3.0	Outcome → flywheel surveys. Not storefront UX.
Feature flags + product analytics	PostHog	ops sibling	PostHog/posthog	Live demo — posthog.com	MIT	Flags + funnels + replay. Not a storefront donor.
Ops SQL / BI	Metabase	ops sibling	metabase/metabase	Live demo — metabase.com	AGPL-3.0	Ops BI on Supabase. Not the product SLA queue (Command Centre stays in-repo).
Catalogue search	Meilisearch	ops sibling	meilisearch/meilisearch	Live demo — meilisearch.com	MIT	Customer Spare/Grocery/Laundry offer search. Postgres remains catalogue SoR.
Ops visual automation	n8n	ops sibling	n8n-io/n8n	Live demo — n8n.io	Fair-code / Sustainable Use	Supplier chase, CRM → Brevo, Chatwoot bridges. Not money SoR.
Durable money / delivery workflows	Temporal	ops sibling	temporalio/temporal	Live demo — temporal.io	MIT	Job Reserve, FDMS sequences, DeliveryDispatchWorkflow. Engine — not a UX donor.
Temporal ops UI	Temporal Web UI	ops sibling	temporalio/ui	README / screenshots — Temporal Web UI docs	MIT	Ops visibility for Money + DeliveryDispatch. Not product admin home.

Branch / app	Donor	Role	Repo	Demo	Licence	How DIAL uses it
Supplier / admin CSV map→validate→preview (D-46 must-adopt)	csv-import (Tableflow)	primary UX donor	tableflowhq/csv-import	Product site — tableflow.com (embeddable importer; cloud not SoR)	MIT	Embed importer modal in supplier-web + unmatched queue. Emit rows → DIAL match/OCR. Do not use Tableflow cloud as SoR.
Care + Fleet vehicle compliance (D-46 must-adopt)	Tracktor	primary UX donor	javedh-dev/tracktor	Live demo — tracktor.bytedge.in	MIT	Garage / insurance-PUCC / maintenance / reminder widgets. Not courier dispatch SoR.
PDF statements (D-46 must-adopt)	react-pdf	library	diegomura/react-pdf	Live demo — react-pdf.org	MIT	Supplier settlement, tech payout, Care/Fleet statements from ledger DTOs. FDMS fiscal PDF stays ZIMRA path.
Technician / courier Bluetooth print (D-46 must-adopt)	ESCPOS ThermalPrinter Android	library	DantSu/ESCPOS-ThermalPrinter-Android	README / screenshots	MIT	Bag tags / customer copy. Not fiscalisation device (D-40a = virtual FDMS).
BullMQ inspector (D-46 must-adopt)	bull-board	ops sibling	felixmosh/bull-board	README / screenshots — mount behind admin SSO (no public demo)	MIT	Eng/ops board for reindex, Sharp, webhooks, dispatch timers. Not product SLA queues.
Admin / tech roster calendar (D-46 must-adopt)	Schedule-X	library	schedule-x/schedule-x	Live demo — schedule-x.dev	MIT	Multi-tech day board bound to DIAL assignments. Do not replace Cal.com for customer bookable slots.
Admin triage inspiration (D-46 backlog)	Plane	secondary	makeplane/plane	Live demo — plane.so	AGPL-3.0	Keyboard claim/resolve, SLA badges. Reimplement in admin-web. Do not fork Plane into the monorepo.
KYC / credential capture (D-46 backlog)	Ballerine	secondary	ballerine-io/ballerine	Product site — ballerine.com	ELv2 (default)	Document-step UX + review queue study. No Ballerine as identity SoR. ELv2 ≠ OSI.
Evidence gallery — jobs, POD, Laundry photos (D-46 backlog)	PicPeak	secondary	PicPeak/picpeak	Live demo — demo.picpeak.app	MIT	Lightbox, keyboard next/prev, approve/reject for dispute + POD + near-dupe. Not a customer photo-sharing product.
B2B statement layout polish (D-46 backlog)	SolidInvoice	secondary	SolidInvoice/SolidInvoice	Product site — solidinvoice.co	MIT	Visual polish for PDF/HTML statements. Reject as marketplace invoicing SoR.
Care / Fleet portal IA (D-46 backlog)	Lago	secondary	getlago/lago	Live demo — getlago.com	AGPL-3.0	Customer portal information architecture only. DIAL Care entitlements stay in-repo. No Lago as subscription SoR.
Trust / fraud research (D-46 backlog)	DGFraud	schema-only	safe-graph/DGFraud	README / screenshots — research code, no product demo	Apache-2.0	Offline graph experiments. Not launch-critical. No GNN in money path without eval gate.

URL verification (this pass)

These URLs did not confirm cleanly. They remain the best official links; treat as **unverified** until clicked:

- Nimara ecommerce demo: <https://demo.nimara.store/> (500)
- <https://fix-it-now-chi-beige.vercel.app/>: <https://fix-it-now-chi-beige.vercel.app/> (404)

Sources: v4 §6.2.1 / §6.10 / D-38, Pack §9, OSS stitch, Donor Parity Roadmap, Groceries plan, Laundry blueprint, app READMEs, dial-donor-identity. Text SoR: DIAL_Donor_Repos_and_Demos.md. Pattern only — DIAL APIs remain SoR.
